WIS 23 reconstruction project update

In an effort to maximize crew efficiencies and assure finishing the WIS 23 reconstruction project by the required completion date of November 15, 2019, the Wisconsin Department of Transportation will be allowing work on stage four (Barry Street to Ellis Street) to begin on approximately August 12, 2019. The work will start prior to the completion of work on stage three (Lake Avenue to Barry Street).

This will allow multiple crews to work at the same time. Once stage three is completed (anticipated on August 27, 2019) the section of road from Lake Avenue to just west of Central Avenue will be opened as stage four work continues.

During this time, when work on stage three and stage four are occurring, WIS 23 will be closed from Lake Avenue to Ellis Street. Both Lake Avenue and Ellis Street intersections will be open.
